“CLASS 10”®

Custom Travelers Documentation and Clean Room Forms

Extensive capabilities include, custom sizing, imprinting and unique product development, using white or color clean room paper stocks in variable weights and thickness.

Fulfillment and custom applications

- All products available in Sterile format
- Customized Clean Room Autoclavable letterheads with watermark
- Stacking Applications - Variable Clean Room papers for separating, stacking and moving components
- Custom Kit Work
- After Market Cleaning
- Clean Room punching and trimming

“CLASS 10”®

Custom Signage & Design Services

Your choice of either 80#/ 217 gm. Clean Room Cover, or 130#/ 352 gm. Clean Room Cover.

We will print your clean room signs or documentation, one-sided or two-sided. Maximum size is 19" X 13". Send your file and specifications, and our designers will send you a PDF Proof, for your approval, before we print.

Sterile versions are also available.

There are many applications in any critical environment, including Pharmaceutical, Medical Device and Semi-Conductor.

“CLASS 10”®

STERILIZATION

We offer almost all of our “Class 10” cleanroom products in irradiated/ sterile versions. The irradiation process does not affect the physicality or general aesthetic of our products. It is suitable for biochemical, lab testing, research, and pharmaceutical environments where sterile versions of consumable products are required.

Each one of our sterile version products comes with full certification of irradiation and lot trace-ability. **This process meets and often exceeds ISO 13485, 11137 and 11135 standards, SLA requirements and strict QA and QC ISO compliant processes.**

“CLASS 10”®

Our “CLASS 10”® stationary products are manufactured from the highest quality clean room compatible materials, then cleaned and double packaged under “Class 10” or better conditions.
